Little White River's Anglican Church is worth a look-see too; pick up antiques and treasures from the Mission End Trading Post; the butterfly garden will enchant; follow a hunting leopard at the exclusive Sabie Sand Game Reserve.

Komatipoort, at the confluence of two rivers, has a perfect winter climate. From here you can take daytrips to Swaziland and Mozambique; the markets are full of delicious subtropical fruit; tiger fishing in the Komati River is top notch; elephant-back safaris are unique.

These destinations are all beautiful. They're also all close to the marvels of the southern Kruger National Park. Skukuza, perfectly positioned on the banks of the Sabie River, is right in its heart and is established enough to have an excellent golf course.

Its deep valleys hold rare trees; animals take advantage of the distinctive rocky koppies; Jock of the Bushveld was born where the old wagon trail crosses a stream at Ship Mountain.

This is where the white rhino can be found; cheetahs and wild dogs are more plentiful than lion; and bushwalks are a must. Not only can you get up close and personal with the plantlife and smaller animals, you'll also be able to experience the heart-thudding feeling of tracking a buffalo, elephant or big cat through the African bush.

Perhaps this is why so many say there is something about Africa that simply feels different. It's certainly why, once hooked you're bound to return. ■
